jumpix jump

I've wanted to write a review ever since I saw the video. This game is absolutely one of my favorite RPG game ever. It has great open world elements with a slice of story. And at such a low price, its perfect! If you're wonderig whether or not to get this game, get it. Trust me, you'll thank me later.

Of course every game has to make improvements, of course these are only suggestions (and keep in mind that this game is still in early access) But I highly recomend the dev looks in on this.

- Hard to interact with things (you have to be facing them and one block from them) although you could just use your mouse.
- Lighting, although I LOVE how the lighting works. it could be a prefectly sunny day and the room would be like a dungeon inside

- Unique mobs. This would be a great addition, maybe adding prefixes, that would be cool.

And thats it, Thats al this game really needs in my opinion. Of course Im a stickler for games like these.. I have tried to enjoy this game twice; this second time with a pause of like 2-3 years (I didn't delete the game in the meantime). TL;DR: NO, I couldn't like it.

What is it? Another game that uses your music as a part of the gameplay. You have to get rid of boxes by clicking, like in Bejeweled (or for hipsters, Candy Crush), based on your music's beat. Sounded great, I thought, I'm listening to music right now, why not inside a cool game?

Ah, not so cool. The execution is terrible. The tutorial is a long text mess (are we in the 90s?). There's no way to change in-game controls. Double-click is said to select a "group" but in fact it only selects 3 boxes even if there's more nearby (and it would give ya more points).

Yet the worst part is the game's beat recognition: It is so poorly done, that YOU have to accustomize to the game's "beats", not the other way around. It kills all enjoyment because you can no longer listen to the music but you must instead try to understand whether the game is going to make a "beat" out of it (yeah granted, maybe it would work better for the generic club dance music).

I cannot recommend this game. I'd rather play bejeweled without beat mechanics with my music playing in the background. In the end, there're other music-based games out there.... Would be cool if wouldn't lag every 10 seconds.. If Endwar got the BF2142 treatment, it'd make this game, Only real issue with it is that it doesn't have MP bots, but the missions are solid. Worthy at a discount.. Amazing game, great time killer, and all around fun.. EEAHUEGUGUEGUEGEEEHUAGEUGAAA!. Before pixelated graphics were "cool", Delta Force was busy kicking 5 pixel tall bad guys' @\$ all around the world.

The old school tactical FPS before Ghost Recon took over. Lots of fun and not too difficult. (Vs. the old Ghost recon games where once you step into view of the enemy, you're going to die if you don't have your squadmates act as cannon fodder.)

Your typical mission: Follow the waypoints, shoot all the bad guys. Don't get killed yourself. Congratulations, mission successful. "You defeated the bad guys. You're making the world a safer place! Also, intel recovered during this mission has lead to the whereabouts of badder bad guys!" Enter: the next mission.

PROS:

- Open world combat

- Customizable controls

- Realistic Military weapons with alt fire modes for primary weapons (M4 + M203, MP5SD, M249 SAW, M40A1 Sniper, Barrett .50 Cal Sniper, Colt .45 Pistol, .22 Suppressed Pistol)

- Customizable loadout (to an extent - I wish they would let you choose 2 primary *guns* instead of one gun and one explosive weapon or double ammo)

- Options for tweaking missions/difficulty (Player HP, Enemy HP, Enemy AI, Powerups, Radar)

- runs on windows 7 64bit

- shooting bad guys (stick pixel figures)

---

CONS:

-max 1024x768 resolution

-low res textures, low poly models, low quality animations. Come on.. what do you expect?

-I can't detonate the satchels :(

-Did not get to kill Osama Bin Laden. Im getting a refund.

What I hoped for was a Marble Blast revival. Instead what I got was a nonsense physics system and randomized levels thus making the want to compete for fastest times die. Why have a game where level completion speed is the focus yet make the levels random AND not have the a quick restart button mapped?

Furthermore, the UI is bad and the game does bugger all to actually tell you what the \u2665\u2665\u2665\u2665 you're doing. It took me a couple of attempts to figure out that I wasn't supposed to be going after the gems, but instead the black spirits or whatever the \u2665\u2665\u2665\u2665.

Dissapointment.. I was look for a good indie game for my youtube channel and The Orb Chambers caught my eye. I enjoy strategy games and if you enjoy strategy games. Yes reccomend it. If you don't then you might want to look up some videos on youtube to see if you are interested I think It's very unique compared to other strategy games.

This game is pretty scary! Probably my favourite feature was that in some places the room that you were just in changed completely making you feel like you've been there before but at the same time you haven't and it really messes with your head which I LOVED. At this price this game is a steal. Highly recommended!

<https://www.youtube.com/watch?v=v5OoLNq4IjE&list=UUUV3Kx3vCAIKxx5H7Lh7SzOg>. Ever see that episode of family guy where Stewie goes into peter's testicle, yeah its that in a weird erotic form. 11/10 went for a wank afterwards.. A lovey blend of Mechanics, art, story and music.

<https://www.youtube.com/watch?v=PosXpeunVZM>. i love cats. It is a really good game but very short. You fly a mission on your choice. Think there is 6 in all. Will only take u maybe an hour. Replayability is ok but even likeing the game I only have 3 hours into it. If u can get this for 1 dollar or less I would say get it but at 3 dollars I cant recommend it because of the short life span of the game.. Good! This puzzle game contains beautiful puzzles. Very detailed pictures and the pieces always fit when you think they should. Nicely crafted game. Lots of puzzles too.. 20mins in and me mind is now blown. shhh it is england.. This is not a review.

This is just me writing that this is

a brilliant, fun and heartwarming narrative-driven thing with lovely characters and cool music.

I love it. A lot.. i love the game so far! the only thing thats kind of killing the game is the voice acting for the main character. but other than that, the game is phenomenal! cant wait to see more! made a video, hope yall enjoy it. took at least 8 hours to edit it c;

<https://www.youtube.com/watch?v=aNxesJq9Pcs>. Unique and fun little arcade-y smash-'em-up in VR.

Love how the use of water affects gameplay.

This will workout your legs and back for all the times you're going to want to swim underwater with your arms pushed back.

Mahula recommended!

My only little complaint is wishing more control over your tentacles. Can barely get the trick of using them as whips. Sometimes I feel like they're just dangling there like "dead fish".
